AURORA

Ultralight support ladder!

PRACTICE, STABLE E SAFE!

Ultralight support ladder!

Aurora is aluminium support ladder with the steps welded to mast. **Large 35.5 cm** allows the operator to easily operate and stability.

Aurora present steps with no skid surface and at the base foot anti skid rubber. The latter guarantee greater adherence to the support surface.

Available in different heights (*from 6 to 17 steps*) the support ladder **Aurora** is ideal for lofts, stores, warehouses and garages.

The ladder is in compliance with **UNI EN 131** and **D.Lgs. 81/08**.

The welding of Efesto Ladder is conforms to **UNI EN 287/1**
