### **EFESTO: Aluminium structures and solutions for events** *Quality and attention to detail in every product*

**Efesto** designs and manufactures a wide range of [aluminum structures for events](#) as: concerts, shows, sporting events.

The variety of types and dimensions of the structures makes it possible to respond to every need, providing valid and different solutions.

The [aluminum covered structures](#) proposed by **Efesto** are easy to assemble and consist almost entirely of standard components and can be: single pitch, double pitch and arc.

Below the different Efesto roofing system solutions:

- **GAZEBO** roofing systems use the square truss side **29** or **40 cm** long side as the basic module and can be single pitch, double pitch or arc. They are ideal solutions for small events and exhibition stands. Aesthetically elegant, they are fast and easy to assemble.

An example of easy and fast coverage a different gazebo every time is **Speedy Roof**. **Speedy Roof** is the easy roof system available in linear or arc version, structured with built-in slide guides for cover sheets and adaptable to each structure with fast **steel coupler GC/02**.

For the coverage of large spaces the ideal gazebo solution is **Kòsmosfera**. With its refined and elegant shapes **Kòsmosfera** creates a scenographic and architectural solution of great impact and elegance for receptions, weddings, parties of all kinds. Modularity allows the creation of corridors and related adjoining spaces;

- The roof systems realized by **Efesto** with single, double pitch or arch are structured with the traditional square modules 29 or 40 cm long side of the Superior or Easy series (**Single Pitch** and **Double Pitch**). They can be

equipped with lateral wings for hanging audio and video systems. The alternative to traditional roof systems based on the square truss is represented by **Horizontes**.

**Horizontes** is structured cover with compact flat aluminum modules 40 or 74 long side with built-in sliding guides. **Horizontes** is the series of infinite possibilities combinatorial with high performances, fast assembly times and reduced handling and storage space;

- **Ground Support** are high performance modular structures with linear or arc configurations. **Ground Support** are structured with **HIGH load** trusses allow the configuration of long and high performance, allow the configuration of high loading capacity and wide spans. These structures are ideal for covering large areas of the stage and backstage during concerts and events.

Between the **Ground Support** roofing systems, a special mention is required **AstroRoof**. **AstroRoof** is a spatial roof based on combination the aluminium anti skid main chords and diagonals combined with special steel node.

**AstroRoof** can be used with the innovative **ASTRO** tower, the tower completely disassembled. **AstroRoof** is designed for the management of large events and shows. It is the answer to the need to manage high performance solutions with a small encumbrance and storage;

To operate safely aluminum structures should be properly ballasted. The roof systems solutions designed and made by **Efesto** are **Made in Italy** and are certified in according to current regulations.
